

6/12/24V electronic, automatic battery charger for WET, GEL, AGM, MF, SPIRAL, START-STOP batteries, for automatic charging/maintenance (PULSE TRONIC) and recovering of sulphated or very low batteries. It is very easy to use, thanks to the automatic recognition of the type of battery, and the presence of a user-friendly keypad. The innovative Power Stream technology guarantees better performance, up to 50% more than traditional battery chargers thanks to more effective and complete control of the charging process, to notably faster charging times and maintenance of the optimal battery conditions, which guarantee a longer working life. The Pulse Tronic technology guarantees optimal battery charging over 8 phases which test, monitor, increase and maintain the charge state. Characteristics: automatic charging/maintenance, BOOST quick charge * SMPS (Switch Mode Power Supply) Technology * Pulse Tronic charge with pulsed charge holding * LED signalling of the charge state, end of charge and protection intervention * sulphated battery recovery selection * clamps not powered if disconnected from the battery * anti-spark device, protection against short-circuits, polarity reversal, overvoltage at input and faulty battery. Fit with PFC device.
