

Microprocessor controlled, multiprocess MIG-MAG (continuous, PULSE)/FLUX/BRAZING/MMA and TIG DC-Liftinverter welding machine. The flexibility of use and the different materials welded (steel, stainless steel, aluminium), braze-welded (galvanized and zinc-plated sheets), the cold-arc welding processes with low thermal transfer allow for a wide range of application in a variety of sectors, from maintenance to installation and bodywork operations. The rapid SYNERGIC adjustment of welding parameters, thanks to the multicoloured graphic interface ONE TOUCH TFT SYNERGY technology, makes the product exceptionally user-friendly. The intelligent and automatic control of the arc, instant by instant, will maintain high levels of welding in all working conditions, with different materials and/or gases. It is supplied with a number of pre-set welding programmes, with the possibility to store also customised welding programmes. Complete with torch, work clamp and cable.
